

# Just Breathe...

At Pacific Coast Trane we want breathing to be easy and worry-free. You want your valued customers and loyal employees to feel safe and at ease while residing indoors. We can help. Restaurants, Private Dining and Happy Hour Rooms, Wine Tasting Cellars, Sports Bars, and Night Clubs are all spaces that can benefit from the clean air solutions we offer!

You can provide significant, essential air quality solutions with Genesis! We offer highly-effective choices to combat the Covid-19 virus, smoke, fumes, tear gas, kitchen odors and other volatile biological contaminants (VOC's).

CREATING CLEAN AIR TO BREATHE

Three effective stages, while working together, continually cleans the air in a room!

## Stage 1 CAPTURE

The returning room air is pulled back through a high-capacity MERV-13 filter that starts the air cleaning process.

## Stage 2 CLEAN

Powerful ultraviolet UVGI lights are used to clean and energize the specialized, patented photo-catalyst media.

## Stage 3 CONVERT

Media imbedded with titanium dioxide energized by the UVGI lights cleanses the air and renders the contaminants non-viable.

The Genesis Air Solutions Models 2008B, 2008 DT-FP are both stand-alone units, and the RGS III can be stand-alone or stationary. All units clean and recirculate the air without disrupting any current HVAC system. Plus, the panels can destroy [COVID-19 particles](#) found in droplet nuclei by creating free radical in the form of reactive oxygen species namely hydroxyl radicals!

Model 2008B plugs in and starts working immediately like a household appliance.

Model RGS III is a stand-alone unit designed to be wall-mounted or stationary.

Model 2008 DT-FP combo for permanent installation in the ceiling.

Genesis Air Solutions drastically improves indoor air quality with [Photocatalytic Oxidation](#) that break down airborne contaminates!

## Breathing is Easy with Genesis!
